Beat inflation. \$10.00 put in the bank today will not be worth \$10.00 5 years from now. But \$10.00 invested in our small plants should be worth \$50.00 to \$100.00 in a few years. In addition you get a lot of pleasure watching them grow. You are also doing your part to add beauty to a troubled world.

The plants we have to offer are too small now for landscaping, but by placing them in a nursery bed and carefully nurturing them - you will be surprised at the lovely showing they will make in 2 or 3 years. The specimens of Azaleas, Pieris Japonica, flowering trees, weeds and shrubs many of our customers have acquired in a few years are amazing. These plants would be quite expensive if purchased as large specimens but with a little patience and time you too can produce specimens from these baby plants we have to offer.

The plants are widely described in Heide's Book on Shrubs and Book on Trees at \$4.00 each postpaid. We can supply both. Make good Christmas and birthday presents. All plants should be grown in a bed for one or more years before planting in permanent place.

For \$5.00 you can select \$6.00 worth of plants from this list. Prices include packing and postal charges. As we sell our plants at such low prices no order of less than \$2.00 will be accepted. No broken lots will be sold. Where order calls for 5 for 50 etc. we will not be sold for 10 etc. 5 must be ordered. 25 sold at 100 rate.

Prices over \$100 are on no discount.

Please suggest one substitute per 10 items ordered.

Owing to our careful packing with wet peat moss; the cost of Express and Parcel Post to points beyond Rocky Mountains, eliminates the profits. Therefore, please add 10% to remittances from these places.

The group containing azaleas are very easy to handle if planted in part shade, provided either by a building or a lath screen; this should be elevated 4' to 5' on stakes to provide free circulation of air underneath. Plant in a soil mixture containing 50% good light garden loam and 50% granulated peat moss or oak leaf mould. Water well after planting and mulch with leaf mould or peat moss. Do not cultivate but pick weeds out by pulling. Do not allow ground to get dry, but do not water too much or too often, there is a happy medium. These plants will all do well in part shade and also in sun. Cut off 75% of light for first 6 weeks and then 50%.

AZALEAS AND OTHER ACID LOVING PLANTS:

Quintus B. H. Wilson said speaking of Azaleas. "They are not surpassed in wealth of blossom by any class of hardy shrubs. The flowers vary enormously in size in the different species and embrace all shades of every color except blue. In many, the flowers are delightfully fragrant, -- small wonder the desire to possess them is so general. No class of shrubs possesses greater attractions, and given certain essential conditions and provided the varieties are perfectly hardy their culture is fairly simple."

A Philadelphia collection of Azaleas and Rhododendrons is visited each year by thousands of people who marvel at the brilliant, vivid colors and profusion of bloom, which is almost unbelievable, and yet for a few dollars and a bit of patience a more extensive range of colors and varieties is available from this list.

- Azalea AMOEBA - Semi double purplish red flowers in profusion. Small evergreen leaves, turning beautiful bronze in fall - 3-5" - 3 for 50 cents.
- " Alanwold Brick, vivid brick red flowers, semi evergreen, grows tall 3-5" 3 for 50c.
